

### SUMMARY

Dedicated and results-driven Backend Web Developer with extensive experience in building scalable, high-performance server-side applications. Proficient in modern back-end technologies and frameworks, with a strong focus on creating robust APIs, database management, and system integrations. Skilled in collaborative environments, mentoring, and agile methodologies.

### SKILLS

- **Programming Languages:** NodeJS, ExpressJs, GO
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Back-End Frameworks:** Express.js, Django, Ruby on Rails, Gin.
- **APIs:** RESTful APIs, GraphQL, WebSocket.
- **Cloud/DevOps:** AWS (S3, EC2, Lambda), Docker, Kubernetes, Heroku
- **Tools & Methods:** Git, GitHub, Webpack, Agile (Scrum, Kanban), CI/CD Pipelines
- **Professional:** Team Leadership, Code Reviews, System Architecture, Mentoring

### EXPERIENCE

#### Code Reviewer

MICROVERSE | Lagos, Nigeria

January 2022 – 2023

- Conducted comprehensive backend code reviews and provided actionable feedback to improve code performance and maintainability.
- Ensured alignment with industry standards and best practices in server-side development.

#### Mentor & Backend Developer

MICROVERSE | Remote

December 2021 – 2022

- Guided and supported junior developers through backend-focused code reviews, troubleshooting, and best practices.
- Proposed architectural enhancements to improve API performance and database efficiency.
- Led collaborative team projects focused on server-side solutions for community-driven applications.

#### Mastercard Cybersecurity Virtual Experience Program on Forage - August 2024

- Completed a job simulation where I served as an analyst on Mastercard's Security Awareness Team
- Helped identify and report security threats such as phishing
- Analyzed and identified which areas of the business needed more robust security training and implemented training courses and procedures for those teams.

## Fidelity Investments Customer Relationship Advocate Job Simulation on Forage - August 2024

- Completed a simulation focused on learning customer service on the Fidelity Investments team.
- Navigated multiple customer calls effectively using active listening skills.

## HIGHLIGHTED PROJECTS

### API Development for Leaderboard System

- Designed and implemented a robust API for storing and retrieving user scores efficiently.
- **Technologies Used:** Node.js, Express.js, MongoDB, AWS
- **Key Achievements:** Reduced API response time by optimizing database queries.

### Task Management Backend

- Developed the server-side logic for a task management application, including authentication and data handling.
- **Technologies Used:** Django, PostgreSQL, RESTful APIs
- **Key Achievements:** Improved security by implementing JWT-based authentication.

### Scalable Calculator Service

- Built a backend service for a calculator app with dynamic operation handling using server-side logic.
- **Technologies Used:** Ruby on Rails, Redis
- **Key Achievements:** Enhanced service reliability with efficient load balancing.

## EDUCATION

### B.Sc. Cybersecurity (In Progress)

Caleb University | Lagos, Nigeria

2023-2027

- Building foundational knowledge in cybersecurity principles, including secure coding practices, cryptography, and system security.
- Coursework includes topics that complement backend development, such as secure APIs, database security, and network protocols.

# **Backend Development Program**

**MICROVERSE | Remote**

*October 2021 – 2022*

- Completed over 1,300 hours mastering backend technologies including Node.js, Django, and database management.
- Gained deep expertise in system architecture, API design, and server-side performance optimization.
- Practiced industry-standard workflows, including Git-flow, daily standups, and pair programming.
